

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

CONSTITUTION AND BY-LAWS
OF THE
AMERICAN SOCIETY OF MICROSCOPISTS.

CONSTITUTION.

ARTICLE I.—This organization shall be called the “American Society of Microscopists.” Its object shall be the encouragement of microscopical research.

ARTICLE II.—Any person interested in microscopical science may become a member of the Society upon recommendation, in writing, by the members, nomination by the Executive Committee, and election by a majority of the members of the Society present at any regular session of the Society. Honorary members may also be elected by the Society on nomination by the Executive Committee.

ARTICLE III.—The officers of this Society shall consist of a President and two Vice-Presidents, who shall hold their office for one year, or until their successors are elected and qualified, and shall be ineligible for re-election for two years after the expiration of their terms of office ; together with a Secretary and a Treasurer, who shall be elected for three years and be eligible for re-election.

ARTICLE IV.—The duties of the officers shall be the same as in other similar organizations ; in addition to which it shall be the duty of the President to deliver an address during the meeting at which he presides, of the Vice-President to audit the Treasurer’s accounts, of the Treasurer to act as custodian of the property of the Society, and of the Secretary, with the advice and assistance of the President and Treasurer, to act as Publishing Committee and to edit and publish the Proceedings of this Society.

ARTICLE V.—There shall be an Executive Committee, consisting of the officers of the Society, the past Presidents, and three members elected by the Society.

ARTICLE VI.—It shall be the duty of the Executive Committee to fix the time and place of meeting of the Society, arrange the business, manage the general affairs of the Society, and superintend the publication of the Proceedings.

ARTICLE VII.—The election of officers shall be held on the morning of the last day of each meeting. Their terms of office shall commence at the close of the meeting at which they are elected.

ARTICLE VIII.—Candidates for office shall be nominated by a committee consisting of seven members of the Society. The committee shall be elected by a plurality vote by ballot after free nominations.

ARTICLE IX.—The initiation fee shall be three dollars, and the dues shall be two dollars, paid in advance annually. No applicant shall be considered a member until he has paid his dues; and any member failing to pay his dues for two consecutive years, and after due written notification from the Treasurer, shall forfeit his membership.

ARTICLE X.—Amendments to the Constitution may be made by a two-thirds vote of all members present at any annual meeting, after having been proposed at the preceding annual meeting.

BY - L A W S .

First—Papers read before the Society shall be acted upon by the Executive Committee at their next session and the question of their publication in the Proceedings decided, in order that notice of such publication may be given to the authors of papers by the close of the meeting.

Second—All papers accepted for publication shall be referred to a Publishing Committee, consisting of the Secretary as chairman, with the President and the Treasurer as advisory members.

Third—The manuscript and drawings of any paper accepted for publication shall be filed with the Secretary by the middle of September next succeeding the meeting at which such paper was read.

Fourth—It shall be the duty of the Publishing Committee to issue the volume of Proceedings not later than the first of January next succeeding each meeting.

Fifth—An edition of six hundred copies of the Proceedings shall be published each year; in addition to which each author of papers shall be furnished with twenty-five copies of his paper (with accompanying plates) gratis, and as many more, at the cost of publishing, as he may request at the time that his manuscript is sent to the Secretary.

Sixth—Papers accepted for publication by the Society may be published in any reputable journal after they have been read before the Society, provided due acknowledgments are made of the fact that they are from the Proceedings of the American Society of Microscopists, and that the original manuscript shall be left on file with the Secretary of the Society.

Seventh—Any member failing to pay his dues for three consecutive years shall be dropped from the roll of members, with the privilege of reinstatement at any time by payment of all arrears, and the annual Proceedings shall not be sent to any member whose dues are unpaid.

Eighth—All motions or resolutions relating to the business of the Society shall be referred for consideration to the Executive Committee before discussion and final action of the Society.

MEMBERS.

Lists of members are published in the Proceedings every year except 1887. The figures denote the year of the members' election, except '78, which marks an original member. The Proceedings are not sent to members in arrears, and two years' arrearage forfeits membership. (See Art. IX Constitution, and By-law VII.)

HUDSON, CHAS. T., A.M., LL.D., President R.M.S., '88,	
6 Royal York, Crescent, Clifton, Bristol, England.	

GENERAL INDEX

For everything published by the Society to the end of 1890. A general index was published in 1882, and biennial indexes subsequently in **84**, **86**, and **88**. The Proceedings bind conveniently in five volumes, 1879 to 1882 in one, and then two years to a volume. Papers read but not printed are indicated by a star before the title. The year is marked by **heavy-faced type**. The No. of the Vol. is always one less than the No. of the meeting, as the Proceedings for 1878 and 1879 made one volume and Vol. II for 1880 is for the 5d meeting.

INDEX TO NAMES OF AUTHORS.

	PAGE
Anthony , Prof. W. A., report on Fasoldt copies of standard centimeter, 84	226
Atkinson , W. H., *on epithelium, 78	15
Atwood , H. F., new apparatus for photo-micrography, 84	176
Bailey , J. W., letter to Chas. A. Spencer, 82	61
—, on angular aperture and test objects, 84	7
Bartlett , W. F., on utilization of ozone in treatment of disease, 83 ..	70
Bausch , Edward, describes a new paraboloid, 81	88
—, describes a new stand, 81	86
—, describes a new turn-table, 81	86
—, facts in life of, 82	47
—, new arrangement of Wenham binocular prism, 83	235
—, universal screw for microscope objectives, 84	153
—, combined inverted and vertical microscopes, 86	148
—, utilization of the microscope, 90	43
Beck , Richard, his paper on reliable screw-threads referred to by Bausch, 84	155
Belfield , W. T., *migration of leucocytes, 78	12
—, microscope in detection of lard adulterations, 83	97
Bennett , A. W., fungi found in sewage effluents, 84	90
Beyer , H. G., *termination of nerves in the testicles, 82	17
Birchmore , W. H., account of morbid growth in a pig's stomach, 83 ..	125
Blackham , George E., *mechanical fingers, 78	10
—, on the systematic examination of objectives, 79	62

	PAGE
Beckham, George E. , homogeneous objectives, should they be made adjustable, 81	61
—, address to members, 82	5
—, annual address, Evolution of the microscope, 82	10, 25
—, relation of aperture to amplification in selection of series of microscope objectives, 83	33
—, memoir of R. B. Tolles, 84	41
—, amplifying power, 89	22
Bleile, A. M. , effects of division of vagi on muscles of the heart, 83	47
—, innervation of the lungs, 81	35
Brownell, Rev. J. T. , *a basis of classification of plants, 82	12
—, in working session, 84	200
—, staining and mounting pollens, 84	212
—, turn-table, 84	173
—, wax cells, 84	214
Bulloch, W. H. , * formula of objectives, 78	10
—, * describes lithological microscope, 80	12
—, describes Congress microscope, 81	86
—, facts in life of, 82	46
—, objects to report of committee on oculars, 83	238
—, magnifying power of microscope objectives and lenses, 84	183
Burrill, Thomas J. , * on the blight of pear, etc., 80	13
—, elected vice-president, 83	265
—, preparing and mounting bacteria, 83	79
—, Uredineæ of Illinois, 85	93
—, Helio-stat, 85	103
—, annual address, Bacteria and disease, 86	5
—, disease germs, 87	193
—, Erysiphæ of Illinois, 87	301
—, Ustilagineæ or smuts of Illinois, 88	45
—, a microscope stand, 89	53
—, microscope objectives, 90	35
Chester, A. H. , describes block-tin cells, 82	19, 282
—, elected member of executive committee, 83	265
—, new method of dry mounting, 83	143
Clark, H. J. , referred to as discovering collar-bearing monads, 84	138
Clarke, Thomas , letter from, presenting Society three slides of <i>Leptodora hyalina</i> , 84	272
Clevenger, S. V. , describes Spitzka's microtome, 83	267

	PAGE
Clevenger , S. V., physiology and pathology of the human brain, 83	141
Cox , Jacob D., angular aperture of objectives, 83	228
—, added to committee on oculars, 83	261
—, new form of microscope stand, 83	147
—, obituary of J. J. Woodward, 84	253
—, photography with high powers and structure of the diatom shell, 84	99
—, presidential address, R. B. Tolles, and the angle of aperture question, 84	5
—, remarks on the structure of Heliopelta, 84	108
—, reply to address of welcome, 84	260
—, response to toast, 84	271
—, actinic and visual focus, 85	29
—, diatom hoops, their mode of growth, 85	33
—, deformed diatoms, 90	178
—, the Coscinodiscæ, 90	184
—, discussion on focusing in microphotography, 90	54
Crisp , Frank, on optical tube length, 84	230
Curtis , Lester, on study of blood, 81	39
—, invites Society to meet at Chicago, 82	12, 15
—, micro-organisms in blood of a case of tetanus, 82	1, 157
—, “ “ “ “ “ 83	88
—, address of welcome, Chicago meeting, 83	248
—, report on adulteration of lard, 83	102
—, bacteria and the cholera bacillus, 85	142
Cutter , Ephraim, the vegetable nature of the membrane in croup, 82	18, 101
—, morphology of rheumatic blood, 84	194
Dayton , Robert, on carbolic acid for insect preparations, 81	88
—, on modification of the Wenham half-disc illuminator, 82	161
Deck , Lyman, <i>Amphipleura pellucida</i> , resolution of, 90	170
Deecke , Theodore, *on the microscopical examination of the nerve centers, 79	26
—, exhibits his apparatus for preparing and examining brain sections, 82	10, 17, 275
Detmers , Freda, comparative size of blood corpuscles, 87	216
Detmers , H. J., pathogenic bacteria, 83	87
—, poisonous dried beef, 85	54
—, numerical aperture, and angle of aperture in air, etc., 85	199
—, photographing by lamplight, 88	143
—, American and European microscopes, 88	149

	PAGE
Draper's method of silvering mirrors, 84	75
Drayton , silvering on glass, 84	71
Drescher , W. A. E., Bausch & Lomb microscope, micrometer, and microtome, 89	131
Duffield , George, few hints on hardening, imbedding, etc., 84	209
—, working session, 84	200
Durkee , R. P. H., structure of the diatom shell, 84	105
Eastman , L. M., egg-like bodies in liver of rabbit, 83	167
—, fat infiltration of liver, 85	60
Everts , Orpheus, M. D., address of welcome, 78	7
Ewell , Marshall D., centimeter scale A, 86	75
—, centimeter scale A, comparison of standard on glass with, 86	83
—, comparison of Fasoldt scale II with scale "A," 87	299
—, further study of scale A, 89	64
—, new forms of stage micrometer, 90	76
—, effect of cover-glass curvature, 90	79
—, detection of forgery in Jerome will case, 90	86
—, standard centimeter made for A. S. M., 90	84
Fasoldt , Charles, presents to the Society a slide of microscopical rulings, 79	22
—, stage micrometer, examination of, by Mendenhall, 82	18, 201
—, mentioned in connection with report on standard centimeter, 84 , 220	
—, plates of, mentioned, 83	156
—, renders a bill for ruling copies of standard centimer, 84	223
Feiel , Adolph, effects of division of vagi on the heart, 82	91, 261
—, effects of division of vagi on the muscles of the heart, 83	47
Fell , George E., * human teeth, plates of, 80	7
—, on binocular microscope and stereoscopic vision, 81	9, 69
—, on carbolic acid in mounting histological preparations, 81	87
—, * on structure of the maize kernel, 82	18
—, cephalic extremity and movements of human spermatozoa, 83	121
—, clinical advantages of ozone and its effects on micro-organisms of infusions, 83	69
—, examination of agreement, Exhibit "B," 84	47
—, Demodex folliculorum, 86	120
—, an efficient deposit glass, 89	139
—, microscope in diagnosis, 89	67
—, examination of legal documents, 89	102
—, Brown Sequard, glandular secretions, 89	115

	PAGE
Fell, George E. , annual address, Influence of electricity on protoplasm, 90	1
Fellows, Charles S. , <i>Ergasilus Chatauquensis</i> and other entomostraca, 87	246
Fisher, J. H. , *on <i>Laguncula piscatoris</i> , an infusorian, 80	10, 44
Fish, Pierre A. , epithelium of brain cavities, 90	140
Forbes, Prof. Charles , chairman soirée committee, 84	234
Francis, Mark , bacillus of foot-rot in sheep, 87	209
Griffith, E. H. , prize offered by, 79 , 23, 80 , 9, 82 , 7, 87	13
—, describes new portable microscope, 80 , 66, 82	149
—, describes a new fine adjustment, 81	86
—, report as auditor, 82	287
—, in charge of working session, 83 , 259, 84	199, 219, 276
—, eye-piece, 84	170
—, microscopist's working cabinet, 84	168
—, nose-piece, 84	170
—, new turn-tables, 84	165
—, immersion objectives, 85	51
—, new and improved apparatus, 85	112
—, new microscopical accessories, 86	150
—, new fine adjustment, 88	161
Gundlach, Ernst , facts in life of, 82	45
—, on light and illumination, 82	12, 79, 255
—, improvement in objectives, 84	148
—, on magnifying power of lenses, 84	232
—, note by, 84	273
—, immersion objectives, 85	51
—, optical errors and human mistakes, 86	157
Gage, Susannah Phelps , ending of muscular fibers in minute animals, 87	207
—, intramuscular endings of fibers, 90	132
Gage, Simon H. , observations on fat cells and connective-tissue cor- puscles of <i>Necturus</i> , 82	19, 109
—, cataloguing, storing, and labeling microscopical preparations, 83	169
—, in working session, 84	200
—, serial sectioning, 84	202
—, epithelium lining the mouth of <i>Necturus</i> and <i>Menopoma</i> , 85	126
—, number of trichina in a given quantity of meat, 87	191
—, tube length and parts included, 87	168

	PAGE
Gage , Simon H., cover glass, thickness of, for which objectives are corrected, 87	171
—, red blood corpuscles of lamprey cells, 88	77
— and S. P. Gage , staining and preservation of histological elements, 89	34
—, picric and chromic acids in histology, 90	120
— and Hopkins , preparing and imbedding the embryo chick, 90 ..	128
Hamlin , F. M., on wheel-like and other spicula of the Chirodota of Bermuda, 82	19, 139
—, microscopical examination of seminal stains, 83	21
—, preparation and mounting of foraminifera, 83	65
—, ideal slide, 84	179
Hatfield , J. J. B., description of rotary section cutter, 84	171
Hawxhurst , D. C., * on the demonstration of the capillary circulation in man, 80	12
Heitzmann , C., * method of examination of blood, 80	40, 43
Henrici , Jacob F., microscope presented by Linnæus to Jussieu, 87 ..	214
— and Mellor , an old microscope, 88	140
Hervey , A. B., * on classification of algæ, 78	11
—, response to address of welcome, 78	8
Hilgard , Prof., reports on standard centimeter, 83	181
Hitchcock , R., * on microscopic measurements, 78	12
—, angular aperture, resolutions on, 78	11
—, unit of micrometry, resolutions on, 78	13
Holbrook , M. L., on structure of muscles of the lobster, 82	17, 131
—, termination of nerves in liver, 82	95
—, termination of nerves in kidney, 83	51
—, development of muscle in chick and man, 85	71
—, development of cartilage in chick and man, 85	76
Hopkins , Dr. H. R., address of welcome, 79	17
Hopkins , Grant S., <i>Amia calva</i> , stomach of, 90	165
Howe , Lucien, on growth of branchial cleft, 79	57
—, imperfection of the eye, and test objects, 85	91
—, bacteria in the normal eye, 89	120
Hyatt , J. D., elected president, 80 , 12, presents the Society a copy of American Quarterly Journal of Microscopy, 79	24
—, *sting of honey bee, 78	12
—, on sporadic growth of certain diatoms and the relation thereof to contamination of water supply, 82	18, 197

	PAGE
Jackson, Chevalier Q. , bacillus of leprosy, 88	119
—, bacteria in ice, relation to typhoid fever, 89	70
James, Frank L. , cover-glass cleaner, 84	181
—, silvering on glass and other objects, 84	71
—, mounting and finishing slides, 86	145
—, shrinkage of cement cells, 87	173
Johnson, H. A. , elected member of executive committee, 83	265
Johnston, Christopher , explains his method of preparing a polarizing crystal, 83	261
Keith, Prof. , mentioned in connection with discussion of angular aperture question, 84	30
Kellicott, David S. , <i>Lerneocera cruciata</i> , observation on, 79	64
—, parasitic crustacea, 79 , 53, 82	75
—, <i>Lerneocera tortua</i> , 80 , 41, 81	12
—, polyzoa observed at Buffalo, 82	13, 217
—, <i>Cothurnia lata</i> , U. S., 83	113
—, floscula, a new, 83 , 105, 85	48
—, crayfish, two parasites of, 83	115
—, infusoria found on the crayfish, 83	105
—, infusoria, N. S., 84	110
—, infusoria, notes on, 84	126
—, examination of legal document, 84	48
—, infusoria, N. S. freshwater, 85	38
—, <i>Argulus catostomi</i> , 86	144
—, additional notes on a rotifer, 87	181
—, infusoria, new and rare, 87	187
—, infusoria, fresh water, 88	97
—, rotifera of Shiawassee river, Corunna, Mich., 88	84
—, annual address, nature of protozoa, 88	5
—, rotifer, a new, 89	32
Kinsman, D. N. , on tumor of the left auricle, 81	9, 29
Krauss, Wm. C. , treating nerve tissues, 90	116
Kruttchnitt, John. , ferns and their development, 83	135
—, on fecundation of ovules in Angiosperms, 84	93
—, pollen tubes again, 85	62
Lapham, W. G. , *on the relation of medium power objectives to micro-biology, paper read, 80	7
Lattimore, S. A. , *on organisms in potable waters, 78	29
Levi, Joseph N. , in working session, 84	202

	PAGE
Lewis, William J. , hair, microscopically examined and medico-legally considered, 84	59
—, annual address, Forensic microscopy, 89	5
Lewis, George W., Jr. , comma bacillus of cholera, 86	84
—, the fallacies of popular bacterial research, 87	254
Litton, A. , * dark field illumination, 78	15
—, * on analyzing eye-piece, 78	1
Logan, James H. , life slide, 85	110
—, device enabling two observers to view objects simultaneously, 85 ..	120
Lyon, H. N. , <i>Attacus cecropia</i> , structure of the moth, 89	135
—, cover-glass support for solid mounts, 90	75
Mansfield, Prof. J. M. , division of labor among microscopists, 83 ..	43
Manton, W. P. , preparation of chick embryo, 85	66
McCalla, Albert , describes a method of immersion illumination, 81 ..	88
—, reports discussions at Columbus, 81	85
—, reports discussions at Elmira, 82	253
—, presidential address, Verification of microscopic observation, 83 ..	1
—, recommends working session, 83	256, 260
—, response to address of welcome, 83	250
—, report of work of officers, 1883, 83	250
McIntosh, L. D. , explains structure of solar microscope, etc., 83 ..	266
—, exhibits stereopticon with ether-oxygen light, 83	259
—, microscope projection attachment, 88	155
Mendenhall, T. C. , on the Faslolt stage micrometer, 82	18, 201
Mercer, A. Clifford , on stereoscopic effects obtained by Powell & Lealand binocular arrangement, 82	19, 127
—, describes and exhibits modified section-cutter, 82	283
—, Syracuse solid watch-glass, 84	178
—, photomicrograph <i>versus</i> microphotograph, 86	131
—, the eye-piece in photomicrography, 90	50
Merriman, C. C. , * methods of mounting opaque objects, 78	9
—, on double staining, 79	71
Mills, Henry , on fresh-water sponges, 82	12, 209, 283
—, on micro-organisms in Buffalo water supply, 82	19, 209, 281
—, referred to as having examined microscopically a legal document, 84	51
—, thoughts on spongiidæ, 84	131
—, fresh-water sponges, 86	132
Moore, Veranus A. , fermentation of urine, 90	97

	PAGE
Newcomer , F. S., * describes brass cell, 82	19
—, on college microscopical societies, 83	227
—, microscopical cabinets, 83	238
—, cleaning and arranging diatoms, 86	128
Nott , Edward S., referred to as having examined legal documents microscopically, 84	54
Oviatt , Boardman L., imbedding cartilage, 86	142
Oviatt and Sargent , nitrite of amyl for injections, 86	140
Oviatt , B. L., cardiac muscle cells in man and mammals, 87	283
Pearson , Leonard, muscular coats of the œsophagus in animals, 88 ..	128
Perry , Stuart H., rhizopods of Oakland Co., Mich., 90	94
Piggott , Dr. Royston, referred to as taking part in discussion of regu- lar aperture question, 84	13
Rafter , Geo. W., use of the amplifier in photomicrography, 87	263
—, high-power photomicrography, 89	112
Redding , Jacob, muscular contractility, 81	10
—, extra vascular circulation of the blood, 84	81
Redding , T. B., on osmic acid, its uses and advantages in microscop- ical investigation, 82	9, 183
Reynolds , R. N., improved methods, 85	124
Rezner , W. B., * remarks on fine ruling by, 78	30
Rochester , Dr. S. F., address of welcome, 79	19
Rogers , Wm. A., * on limit of accuracy attainable in measurements with microscope, 78	9
—, appointed to represent the Society on national committee on micrometry, 82	17
—, his three standard bars, comparison of, with meter and yard, 82 ..	251
—, on a combined standard yard and meter, 82	13
—, on conditions of success in construction and comparison of stan- dards of length, 82	231
—, on naked-eye visibility of single-ruled lines, not exceeding 1-100, 000 of an inch, 82	18
—, a critical study of the action of a diamond in ruling lines upon glass, 83	149
—, correction of formula, 83	240
—, study of centimeter marked "A," 1882, prepared by the U. S. Bureau of Weights and Measures for the committee on microm- etry, 83	184
—, declines the presidency by letter, 84	278

	PAGE
Rogers, Wm. A. , new form of section-cutter, 84	191
—, absolute length of eight Rowland gratings, 85	151
—, temperature in the comparison of standards, 86	67
—, annual address, The microscope in the study of metals under variations of temperature, 87	5
—, radiation of heat between metals, 88	33
—, a method of securing copies of the standard centimeter "A," 89	109
Rowlee, Willard W. , sectioning seeds, 90	113
Sargent, E. H. , meibomian glands of cat, 86	143
Seaman, W. H. , on huyghenian eye-piece, 78	15
—, waxes and cements, 87	345
—, a college microscope, 90	67
Seiler, Carl , new section cutter, 78	15
—, photography as an aid to microscopical investigation, 79	24, 59
—, on mounting materials for histological preparation, 79	60
—, *improvement in microscope stage, 80	12
—, mounting media, 80	9, 60
Sexton, L. R. , describes a new form of fine adjustment, 81	86
—, invites the Society to meet at Rochester, 81	12
Shanks, S. G. , certifies to uniform spacing of Fasoldt copies of standard centimeter, 84	223
Shurley, E. L. , on an improved slide for examination of gaseous matter, 81	10, 65
Sidle, J. W. , new Acme stand, 78	25
—, *turn-table, 78	15
Smith, Hamilton L. , annual address, Influence of algæ on deep-sea life, 80	17
—, on binocular microscope, 81	89
—, on memoir of C. A. Spencer, 82	14, 49
—, on Rhizosolenia gracilis, 82	17, 177
—, a new mounting medium, 84	186
—, remarks on <i>Heliopelta</i> , 84	108
—, annual address, The unconscious influence of natural science studies, 85	5
—, device for testing the refractive index of fluids, 85	83
—, mounting media of high refractive index, 85	86
—, diatomaceæ, life history of, 86	3
—, diatomaceæ, life history of, part II, 87	126
Smith, J. E. , describes the new "Acme" stand designed and constructed by himself and J. W. Sidle, 78	25
—, *remarks concerning modern objectives, 79	24

	PAGE
Spence , Thos. B., external and middle ear of man and the cat, 90	146
Spencer , Chas. A., letter on cover adjustment, 82	72
Spencer , H. A., letter on fluorspar lenses, 90	248
Spink , Miss Mary A., *the choroid plexus, 90	235
Stedman , John M., tapeworm, preparation of, 87	242
—, reproduction in the Sun animalcula, 88	107
—, Actinospharium Eichhornii, 88	107
—, Amphistomum fabaceum, 89	85
Stowell , C. H., offers prize, 82	7
Stowell , T. B., soft palate in the domestic cat, 88	58
Stratton , S. W., and Burrill , heliostat, 85	103
Summers , H. E., slide cabinets, 85	108
Taylor , Thos., *on microscopical work of Department of Agriculture, U. S., 78	28
—, on a new freezing microtome, 82	17, 153
—, internal parasites of the common fowl, 83	131
—, to distinguish fats, 85	128
—, reply to Professor Weber, 86	116
—, crystallography of fats, 87	315
—, pocket polariscope, 88	159
—, tea and its adulterations, 89	46
Taylor , F. W., recommends more time be given to practical work, 83 258, 260	
Taylor , Geo. C., in working session, 84	202
—, improved mechanical lamp, 82	14, 273
Thomas , Mason B., the collodian method in botany, 90	123
Tuttle , A. H., elected secretary, 78 , 30, 79	12
—, spinal cord of Marsipobranchii, 79	22
—, on occurrence of Gregarina in the American lobster, 81	47
—, *on epidermis of Cyclostemata, 82	12
—, on new species of fluke, 82	12
Up de Graff , Thad. S., describes certain worms, 83	117
—, opinion on blood stains, 83	265
—, new rotifer, 83	118
Vorce , Charles M., on destructive power of certain insects, 78	68
—, handy rule for use in micrometry, 78	12
—, *mechanical finger, 78	10

	PAGE
Vorce , Charles M., receives the Griffith prize, 79	13
—, microscopical examination of writing, 80	8, 50
—, penetration in objectives, 80	7, 70
—, forms observed in waters of Lake Erie, 81 , 7, 51, 82	10, 187
—, wholesale destruction of acari by a fungus, 81	7, 49
—, Wm. B. Rezner, memoir of, 83	242
—, focusing and safety stage, 85	115
—, <i>Stephanodiscus Niagarae</i> , 85	139
—, <i>Gomphogaster areolatus</i> , a new rotifer, 87	250
—, <i>Daphnella Tuckermanni</i> , 90	172
—, <i>Gomphogaster</i> , notes on, 90	174
Walmsley , W. H., * new section-cutter, 78	15
—, wax cells and zinc cement, 80	63
—, describes International and Ideal microscope stands, 81	86
—, on microphotography with dry plate, including lantern positives, 82	14, 179, 273
—, photomicrography with dry plates and lamp light, 83	59
—, a handy photomicrographic camera, 90	69
Ward , R. H., * Biscoe's section-cutter, 78	15
—, * on microscopical study of ashes of leaves, 78	11
—, annual address, Objects of the Society, 78	35
—, discussion on handwriting by, 79	58
—, reply to address of welcome, 79	20
—, report by, on micrometry, 82	16
—, report by, on eye-pieces, 82	16
—, history of standard centimeter, 83	178
—, Iris illuminator, 84	160
—, new lens-holder, 84	162
—, presents report of committee on oculars, 84	276
—, resolutions of sympathy with, 84	262
—, micrometer wires, 86	89
—, microscopic societies, 86	94
—, slide catalogue, 87	233
—, microscopical exhibitions, 87	311
—, on the Fasoldt test plate, 87	318
Weber , H. A., examination of butter and its adulterations, 86	103
Wenham , F. H., his discussions of angle of aperture question, 84	7, 36
West , Charles E., forty years with the microscope, 86	161

Whelpley , H. M., * the microscope in pharmacy, 90	215
Whiting , Prof. Sarah F., college microscopical societies, 83	27
Whitney , Jas. E., cheap and efficient life-box, 84	215
—, cheap punches for sheet wax, 84	215
—, rapid section-cutting, 85	122
—, wax as a cell material, 86	153
Wiard , Martin S., microscopic laboratory, 89	126
Wolle , Francis, note on the Desmidæ of U. S., 83	137
Woodward , J. J., mentioned in connection with the discussion of angular aperture, 84	18

CLASSIFIED INDEX OF SUBJECT-MATTER.*

LIST OF TITLES.

	PAGE
1. Annual addresses	279
2. Microscopes and accessories	280
3. Manipulation, micrometry, mounting, and photo-micrography	284
4. Botany	291
5. Zoology	293
6. Miscellaneous, handwriting, etc.	300
7. Necrology	303
8. Minutes of proceedings	304
9. Appointment and reports of committees	304
10. Reports of treasurer, and on Spencer Tolles fund	304
11. Working sessions	305
12. Soiree or evening exhibitions	305
13. Nominations and election of officers	305
14. Constitution in full	305
15. Amendments to constitution	305
16. By-laws	305
17. Amendments to by-laws	305
18. Place and time of annual meeting	305
19. Lists of members	305
20. General indexes	305

ANNUAL ADDRESSES.

Indianapolis, Ind. Orpheus Everts. Address of welcome, 78	6
Buffalo, N. Y. R. H. Ward. Position and objects of the Society, 79 ..	35
Detroit, Mich. H. L. Smith. Influence of microscopical algæ on deep-sea life, 80	17
Columbus, O. J. D. Hyatt , absent, 81 .	
Elmira, N. Y. George E. Blackham. The evolution of the modern microscope, 82	25
Chicago, Ill. Albert McCalla. The verification of microscopic observation, 83	1

* This index has been prepared from the old indexes. Owing to the labor of entire revision, some inconsistencies with the plan adopted may be found, but it is hoped there are none that will make the index less valuable.—W. H. S.

Rochester, N. Y. Jacob D. Cox. Robert B. Tolles and the angle of aperture question, 84	5
Cleveland, O. Hamilton L. Smith. The unconscious influence of natural science studies, 85	5
Chautauqua, N. Y. Thomas J. Burrill. Bacteria and disease, 86 ..	5
Pittsburgh, Pa. Wm. A. Rogers. The microscope as a factor in the study of the behavior of metals under variations of temperature, 87	5
Columbus, O. David S. Kellicott. The nature of protozoa and lessons of these simplest animals, 88	5
Buffalo, N. Y. Wm. J. Lewis. Forensic microscopy, or the microscope in its legal relations, 89	5
Detroit, Mich. George E. Fell. The influence of electricity on protoplasm, 90	1

ADDRESSES OF WELCOME, ETC.,

Made at the Opening Exercises, which are found Printed.

Buffalo, N. Y. H. R. Hopkins and Thos. F. Rochester , 79	11
Elmira, N. Y. S. O. Eleason and Geo. E. Blackham , 82	3, 6
Rochester, N. Y. H. F. Atwood , Mayor Parsons , J. D. Cox , Rev. Dr. Landsberg, prayer, 84	258, 259, 260, 261
Cleveland, O. C. M. Vorce , G. W. Gardner , mayor, and H. L. Smith , 85	225
Chautauqua, N. Y. Dr. J. H. Vincent , 86	207
Pittsburgh, Pa. Wm. A. Rogers , B. C. Jillson , 87	335
Columbus, O. By President Scott , of Ohio State University, 88	173
Newark, O. By C. B. Griffin . Indian mounds, 88	182
Buffalo, N. Y. David H. Day , 89	154

MICROSCOPES AND ACCESSORIES.

Abbe's diffraction theory, 82	253, 261
Acme microscope, first notice of, 79	25
Adjustable objectives , homogeneous immersion, 81	61
Amplifier , use of. G. W. Rafter, 87	263
Analyzing eye-piece ,* Litton, 78	15
Angular aperture ,* Geo. E. Blackham, 78	10
—, *resolution, by R. Hitchcock, 78	11
—, aperture question, 84	15, 39
—, R. B. Tolles' part in, 84	15, 39
—, amplification in selection of a series of objectives, 83	33
Apertometer , Robinson's, 84	7

	PAGE
Aperture of objectives, numerical table, 83	41
— and amplification, relation of, 83	33, 228
Camera Lucida , modification of the reflecting, Moore, A. V., 82 ..	19, 283
—, Wollaston, 84	185
A combined focusing and safety stage for use in micrometry with high powers, by C. M. Vorce, 85	115
Correction of formula, 83	240
Dissecting microscope , a simple form, 84	162
Eye-pieces ,* analyzing, 78	15
—, committee on, 80 , 13, 81	13
—, * construction of Huyghenian, 78	15
—, Griffith's, 84	170
Fine adjustment , Griffith's, 81 , 85, 88	161
—, Gundlach's, 81	86
—, Seaman, 90	67
Finger , mechanical,* 78	10
Formulae of objectives,* 78	10
Homogeneous immersion objectives , should they be adjustable or not, 81	61
Huyghenian eye-piece ,* construction of (published in American Naturalist), 78	15
Illumination , a new method of dark field, 78	15
Illuminator , Wenham half-disc, modification, 82	19, 181
Immersion objectives , by Ernst Gundlach, 85	51
Immersion illuminator , a method of, 81	88
Improvement in microscope stage ,* 79	12
Improvement in objectives , 84	148, 268
Iris illuminator , 84	160, 275
Lens-holder , 84	162
—, magnifying power of double convex, 84	184
Lithological microscope , Bulloch's, 80	12
Microscope , Acme, 79	25
—, legal use of, 79	44
—, improvements in, 79	35, 36
—, Griffith club, 80	12, 66
—, Griffith club, 81	86
—, Griffith club, 82	61, 149
—, portable, 80	66
—, discussion on, 81 , 86, 89	162
—, portable, 82	149

	PAGE
Microscope , Bausch and Lomb, 81	86
—, Bulloch Congress, 81	86
—, lithological, 81	12
—, ideal, 81	86
—, the evolution of, 82	10, 25
—, Beck International, 81	86
—, new concentric, J. D. Cox, 83	147, 235
—, simple dissecting, 84	162
—, combined, inverted, and vertical, 86	148
—, forty years' acquaintance with, West, 86	161
—, presented by Linnæus to Bernard Jussieu, J. F. Henrici, 87	214
—, American and European, H. J. Detmers, 88	149
—, an old, of the Culpeper type, 88	140
—, new form of, W. A. E. Drescher, 89	131
—, stand, T. J. Burrill, 89	53
—, in diagnosis, Geo. E. Fell, 89	67
—, a college, W. H. Seaman, 90	67
—, the binocular and stereoscopic vision, Geo. E. Fell, 81	69
In the above article are mentioned Abbe, 80; Barnard, 80; Nachet, 73, 76; Stereo-pseudoscopic, 77; Powell and Lea- land, 70; Riddle, 73; Smith, 80; H. L. Smith, 89; Tolles, 73, 79, 89, and Wenham, 69.	
—, binocular, 82	19, 127
—, binocular, new, 83	235
—, binocular, discussion on, 81	89
—, binocular, erecting apparatus for, 87	340
Magnifying power of objectives and lenses, 84	183, 274
Measurement of angular aperture and working distance of objec- tives, 89	146
Mechanical finger ,* 78	10
Mechanical lamp , 82	14, 273
Medium power objectives in micro-biology,* 80	7
A microscope attachment —For use with solar or artificial light for projecting or photographing microscopic objects with oblique illumination, or projecting opaque objects, by L. D. McIntosh, 88	155
Microscopical Congress , National, 78	4
I. Microscopical tube length and the parts included in it by the various opticians of the world. II. The thickness of cover-glass for which unadjustable objectives are corrected, by Simon H. Gage, 88 , 168, 90	250

	PAGE
Microscopists' working cabinet , 84	168
Microscopy, medico-legal , 90	213, 217
Nose-piece , Griffiths, 84	170
Objectives ,* formulæ of, 79	10
—, insufficiently described by makers, 79	62
—, measurement of, 79	63
—, modern,* 78	24
—, suitable for photography, 79	60
—, *systematic examination of, 78 , 25, 79	62
—, tabular record of various makes, 79 , 79, 83	185
—, penetration in, 80 , 70, 82	65
—, medium power in biology,* 80	7
—, should homogeneous immersion be made adjustable, 81	61
—, relations of aperture to amplification in selecting a series, G. E. Blackham, 83	33
—, wide-angled, superiority of, d'Alquen, 84	11, 227
—, working series of, 83 , 38, 84	216
—, improvement in, E. Gundlach, 84	148
—, homogeneous immersion, 84	272
—, magnifying power of, 84	183
—, immersion, 85	51
—, four system, water or dry, 85	53
—, numerical aperture of, H. J. Detmers, 85	199
—, numerical aperture, table of, etc., 83	41
—, correction for cover-glass, 86	164
—, apochromatic, 87	342
—, working distance and angular aperture of, 89	146
—, amplifying power of, G. E. Blackham, 89	22
—, discussion on, 90	215
—, fluorspar, 90	215, 248
Oculars , naming and size of tube recommended in report of committee, 83 , 175, 177, 84	228, 230
An old microscope of the Culpeper type, by J. F. Henrici and C. C. Mellor, 88	140
Oleomargariscope , T. Taylor, 88	159
On the amplifying power of objectives and oculars in the compound microscope, by George E. Blackham, 89	22
On several new microscopical accessories, by E. H. Griffith, 86	150
Penetration in objectives, 80 , 7, 70, 82	65
Polariscope , reflecting, 85	263

	PAGE
Polariscope , pocket (oleomargariscope), 88	159
Portable microscopes , 79 , 66 , 80	85
Relation of aperture to magnifying power in the selection of a series of objectives, 83	33, 262
Remarks on a device for enabling two observers to view objects simultaneously, by Jas. H. Logan, 86	120
Homogeneous immersion objectives , should they be made adjustable or non-adjustable, 81	61
Society screw , referred to by Edward Bausch, 84	153
Solid watch glass , 84	178
Some new and improved apparatus , by E. H. Griffith, 86	112
Stage * of microscope, improvements in, 79	12
—, focusing and safety, for micrometry, 85	115
Stereoscopic effects of Powell & Lealand's binocular microscope, 80 , 70 , 81	19, 127
Stereoscopic vision and binocular microscope, Fell, 81	69
Syracuse solid watch glass , 84	178, 277
Tube length , 84	217, 230
—, and parts included, Gage, 87	168
—, report of committee on, 90	229, 250
Two new combined inverted and vertical microscopes , by Edward Bausch, 86	148
Universal screw for microscope objectives, E. Bausch, 84 , 153 , 274 , 86	200
Watch glass , Syracuse solid, 84	178
Wenham's half-disc illuminator , modification of, 82	19, 161
Working cabinet , 84	168

MANIPULATION, MICROMETRY, MOUNTING, AND PHOTO-MICROGRAPHY.

Accuracy attainable in comparison of different units of length, 82 , 240-242	
Acetate of soda bath for photo-micrographs, 83	63
The actinic and visual focus in micro-photography with high powers, by Jacob D. Cox, 85	29
Alcohol balsam , preparation and use of, 80	61
Amyl nitrite for injections, 86	140
Apparatus for photo-micrography , 83 , 59 , 84	176
Bacteria , preparing and mounting, 83	79, 256
—, staining, Gradle's method, 83	83
Biscoe's section-cutter ,* 78	15

	PAGE
Brass cells, 82	19
A busy man's microscopic laboratory , by Martin S. Wiard, 89	126
Cabinet for microscopical slides, 83	171
Camera , measurements with, 84	185
Carbolic acid , in histological preparations, 87	88
—, in insect preparations, 81	88
Canada balsam , histological preparations, 80	61
—, how prepared for microscopical use, 80	61
Cataloguing , labeling, and storing microscopical preparations, 83	169, 236
Cells , block tin, 82	19, 282
—, shrinkage of, causes leakage, 87	173
Cells for dry mounts, 83 , 67, 143, 84	214
Cells , wax, 84 , 214, 86	196, 212
Cement to withstand homogeneous immersion fluids, 84	217
Cement and waxes, 87	345
—, shellac, 88	172
Centimeter , standard, copies of, 84	220, 227
—, history, study, and custody of, 83	178, 200
—, reports on, 83 , 181, 184, 262, 84	220, 227
—, rules for control of, 83	200
Chisels for use in mounting, 84	213
Cleaning and arranging diatoms , by F. S. Newcomer, 86	128
Collodion for micro-photography, 79	61
Collodion method in botany, 90	123
Comparison of Centimeter Scale , "Fasoldt II," with Centimeter Scale "A," by Marshall D. Ewell, 88	299
Comparison of a standard centimeter ruled on glass by Charles Fasoldt, with Centimeter Scale "A," by Marshall D. Ewell, 86	83
Connective tissue , preparing, Ranviers method, 82	415
Copies of standard centimeter, 84	220, 227
Cover adjustment, 84	216, 218
Cover-glass cleaner, 84	181, 278
Critical study of the action of a diamond in ruling glass, 83	149, 258
Dark-field illumination, new plan of, 80	15
Determination of the absolute length of eight Rowland gratings at 62° Fahr., by Wm. A. Rogers, 85	151
Device for testing refractive index of immersion fluids, by Hamilton L. Smith, 85	83
Diamond , action of, in ruling lines on glass, 83	149
—, process of setting for ruling line, 83	155

	PAGE
Discussions of methods and apparatus, 81	85
Double stainings , methods of preparing and mounting, 79	71, 72
Dry mounting , new method, 83	143
Dry plate photo-micrography, 83	59
Electric light for the microscope, 88	179
Farrant's medium , use of, 80	62
Fine rulings ,* Doctors Rezner and Smith, 79	30
Fluid mountings , use of white zinc in, 80	6, 3
A further study of the subdivision of the first millimeter of " Centimeter A ," by Marshall D. Ewell, 89	64
A further study of Centimeter Scale "A" , by Marshall D. Ewell, 86 ..	75
Gaseous matter , slide for study of, 81	65
Glass removed from furrow by ruling diamond takes four characteristic forms, 83	152
—, silvering on, 84	71
Glycerine in histological mounts, 80 , 9, 60, 85	229
" Government standards " of length, 82	232
Graduation of standards , conditions necessary for success, 82	233, 289
Handwriting , microscopical examination of, 78	46, 49
Harvard College, comparing room , 82	248
A Heliostat for photo-micrography, by S. W. Stratton and T. J. Burrill, 85	103
Hints on hardening , imbedding, cutting, staining, and mounting specimens, 84	209, 274
Histological preparations, mounting material, 80	9, 60
How to make wax cells , 84	214
An imperfection of the eye and test objects for the microscope, by Lucien Howe, 85	91
Improved method of constructing slide cabinets , by Henry E. Summers, 85	108
Injecting the cat, 86	193
Knife , method of sharpening, 84	217
Labeling slides , 83 , 169, 84	207
Lamp , improved mechanical, 82	14, 27
Liebig, his method of silvering mirrors , 84	74
—, reference made to his laboratory , by F. L. Janes, 84	71
Life slide , new form of, J. H. Logan, 85	110
Life box , 84	215
Light and illumination , 82	12, 39
—, discussion on, 82	255, 261

Light and Illumination , intensity and quality of, effects on micro- scopic and telescopic observation, 82	79, 90
Lines on glass , conditions in the production, 83	153
—, credibility of claim that 1,000,000 to inch has been ruled, 83	156
—, protection of, 83	156
—, test proposed for a high number claimed to have been ruled and resolved, 83	157
Mailing slides , 79	38
Measuring objects with camera, 84	185
Meter , length of, in inches, 82	245
—, standard yard and, 82	13, 231
—, the, 82	243
—, diagram illustrating division of, 82	234
—, does not conform to definition of 1795, 82	244
Method of dealing with the question of temperature in the comparison of standards of length , by William A. Rogers, 86	67
Method of sectioning cartilage fresh by partial imbedding, by B. L. Oviatt, 86	142
Methods of preparing and mounting bacteria , 83	79, 256
— of silvering mirrors , 84	74, 80
Mica , use of, for covers, 81	87
Micrometer , history of standard, 83	178
—, critical study of standard, 83	184
—, Fasoldt's copies of standard, 83	178
Micrometers , Fasoldt stage, 82	18, 201
Micrometer * rulings, 78	15
Micrometry , * accuracy attainable in, Rogers, 78	9
—, * handy rule for use in, Vorce, 78	12
—, progress in, 79	39, 43
—, reports from secretary of national committee, 79 , 28, 82	16
—, resolutions adopting a unit, 78	15
—, resolutions rescinding adoption of a unit, 79	28
—, Wm. A. Rogers appointed on national committee on, 82	17
Micrometer wires , by R. H. Ward, 86	89
Micro-photography (see photo-micrography), 79 , 29, 62, 82 -14, 179, 273	
—, dry and wet plates in, 79	60, 61
—, of large objects, 79	61
—, monochromatic light for, 79	60
Microscopic laboratory , Wiard, 89	126
Microscopic preparations , cataloguing, etc, 83	159

	PAGE
Microscopic measurements,* 78	12
—, *limits of accuracy in, 78	9
Microscopical college societies, 83	27
Microscopical slide catalogue, 88	233
Microscopist's working cabinet, 84	168
Microtome * (see section-cutter), Bulloch's, 80	12
—, new freezing described, 82	17, 153
—, Biscoe's,* 78	15
—, Schanze, 84	210
Mirrors , method of silvering, 84	71, 80
Mounting materials for histological specimens, 80	60
Mounts, dry, 88	172
Mounting , finishing, and preserving slides, by Frank L. James, 86 ..	145
— in potassium hydrate, 87	358
— media of high refractive index, by Hamilton L. Smith, 85	86
— foraminifera, 83	65
—, new medium, 84	186
—, new method of dry, 83	143
—, serial sections, 84	206
—, Dr. Reynolds' method for sections, 86	190
—, Dr. Reeves' method for sections, 86	191
Mounts, cells , and cements for fluid, 80	63
Nitrite of amyl for injections, 86	140
Robert's test-plates , theory of making, 83	150
—, resolution of, 84	13
—, character of lines of, 83	150
On the best technique for high-power photo-micrography (<i>abstract</i>), by George W. Rafter, 89	112
On a microscopical slide catalogue , by R. H. Ward, 88	233
On the preparation of chick embryos for microscopical examination, by W. P. Manton, 85 , 66; Gage, 90	128
On the use of the amplifier , with observations on the theory and prac- tice of photo-micrography, suggested by the design of a new photo-micro camera, by Geo. W. Rafter, 88	263
Opaque objects ,* new method of mounting, 78	9
Optical errors and human mistakes, by Ernst Gundlach, 86	157
Osmic acid , its uses and advantages in microscopical investigation, 82	9, 103
Permanent microscopic preparations, 82	116
Petitjean's method of silvering on glass, 84	76

	PAGE
Photography, 86	176
—, as an aid to microscopical investigation, 79	59, 62
Photographing with high-power by lamplight, by H. J. Detmers, 88	143
Photo-micrograph <i>versus</i> micro-photograph, by A. Clifford Mercer, 86	131
—, of <i>Amphipleura pellucida</i> by lamplight, 85	230
Photo-micrography (see micro-photography), new apparatus for, 83 , 59, 84 , 176, 90	69
—, with dry plates and lamplight, 83	59, 259
—, with high powers and lamplight, 84	99
—, shown at working session, 86	176
—, with and without eye-pieces, 89 , 166, 90	50, 223
A practical method of securing copies of the standard centimeter, designated " Scale A ," by William A. Rogers, 89	109
Preparation of tin cells , 89	146
Preparation of embedding boxes , 89	146
Preparing and mounting bacteria , 83	79, 256
Rapid section-cutting , by Jas. E. Whitney, 85	122
Remarks on improved methods , by R. N. Reynolds, 85	124
Ruling lines on glass, 83	149
Rulings , micrometric, 78 , 15, 30, 82	201
Schanze microtome referred to, 84	210
Section-cutter (see microtome), new form of, 84	191
—, rotary, 84	171
—, Biscoe's,* 78	15
—, Bulloch's,* 80	12
—, Seiler's,* 78	15
—, Taylor's, 82	17, 153
—, Williams' modified, by F. A. Paul, 82	19, 283
Sensitized paper for photo-micrographs, 83	63
Serial sections , staining and mounting, 84	205
Shrinkage of cement cells the cause of leakage and creeping in glycer- ine mounts , by Frank L. James, 87	173
Silver , advantages of, over mercurial amalgam, 84	73
—, amalgam method of preparing, 84	71
Silvering on glass , method of, 84	71
— on organic and other materials, 84	78, 80
A simple and efficient deposit glass , by George E. Fell, 89	139
Slide for examination of gaseous matter , 81	65
Slides , methods of mailing, 79	38, 39

	PAGE
Slides owned by the Society, 85 , 214, 86	222
Slide , the ideal, 84	179
—, prepared for serial sections, 84	205
—, catalogue, 87	233
Staining and mounting bacteria , 83	79
— and mounting pollens , 84	212, 277
— serial sections , 84	205
— and permanent preservation of histological elements isolated by means of caustic potash (KOH) or nitric acid (HNO ₃), by Simon Henry and Mrs. Susannah Phelps Gage, 89	34
Stainings, double , 79	25, 71
Standards of length , accuracy obtainable in comparison with, 82 ..	240
—, difficulties met with in attempts to use, 82	245, 248
—, English and metric, 82	232
—, gradation conditions necessary for success, 82	233, 239
—, to obtain subdivisions, 82	233
Standard centimeter , 83 , 178, 200, 84	220, 227
—, tube-length , 84 , 217, 230, 90	250
Study of standard centimeter , 83	184, 262
Test-plates , Nobert's, theory proposed to explain method of making, 83	150
—, Fasoldt's, report on, Rogers, 84 , 224; Detmers, 89	140
Tools for wax cells , etc., 84	215, 214
Turn-tables , Brownell's, 84	173
—, Griffith's, 84	165
Turn-table , Bausch & Lomb's, 81	88
—, Griffith's, 81	85
—, Sidle's,* 78	15
Turpentine , preferable to oil of cloves for vegetable sections, 79 ..	72
Units of length , accuracy attainable in the comparison of, 82	240
The use of nitrite of amyl for fine injections, by B. L. Oviatt and E. H. Sargent, 86	140
Varnishes , finishing, 84	219
Visibility * of ruled lines not exceeding $\frac{1}{100000}$ inch in width, Rogers, 82	18
— of lines by naked eye, 90	220
Wax as a cell material, by Jas. E. Whitney, 86	153
Wax cells , in fluid mounts, 80	10, 63
—, how to make, 84 , 214, 86	196
Wollaston camera in measuring objects, 84	185

	PAGE
Yard , the, 82	242
—, diagram illustrating divisions of, 82	234
—, and standard meter, 82	234

BOTANY.

Adulterations of tea, T. Taylor, 89	46
Algæ ,* classification of, 78	11
—, influence on deep-sea life, 80	17
Angiosperms , fecundation of the ovules of, 84	93
Ashes of leaves ,* microscopical study of, 78	11
The bacillus of foot-rot in sheep, by Mark Francis, 87	209
Bacillus tuberculosis , staining, 83	83
Bacteria , preparing and mounting, 83	79
—, effect of ozone on, 83	74
—, remarks on classification of, 83	95
—, remarks on pathogenic, 83	87, 234
—, cause disease, 87	193
Bacteria in ice , especially in relation to typhoid fever, by Chevalier Q. Jackson, 89	70
— in the normal eye, 89	120
Bacterial research , fallacies of, 87	254
Baryeidamia parasitica (fungus), 90	230
Blight * of pear and apple trees, 80	13
Capsella , pollen tubes, 84	96
Cereus , pollen tubes, 84	94, 95
Chlorinated soda , use of, in vegetable preparations, 79	71
—, objections to its use in vegetable preparations, 79	73
Classification * of algæ, 78	11
Cleaning diatoms from marine mud, by Geo. H. Taylor, 85	208
The comma bacillus of Asiatic cholera—a reply to arguments denying that it is an etiological factor in that disease, by Geo. W. Lewis, Jr., 86	84
Compositæ, pollen tubes in, 84	95
Cotton fibers may be mistaken for hair, 84	63
The cultivation of bacteria and the cholera bacillus, by Lester Curtis, 85	142
Cuphea, pollen tubes in, 84	95
Cyclosis in plants (circulation), 82	174, 5
Decoloration of vegetable tissues, 79	71
Desmidiæ , notes on, 83	137

	PAGE
Development of ferns , 83	135
Diatomaceæ , the life history of, by Hamilton L. Smith, Part I, 86 , 30; Part II, 87	126
Diatoms , arranging, etc., 84	218, 219
—, cleaning, etc., 84	218, 219
—, structure of shells, 84	99, 105
—, new, 82	17, 177
—, sporadic growth of, 82	18, 197
—, deformed, 90	178
—, the Coscinodisceæ, 90	184
—, list of Mobile Bay, by J. D. Cox, 85	210
—, Water-washed, by Geo. H. Taylor, 85	207
Diatom hoops —their mode of growth, by Jacob D. Cox, 85	33
— valve , structure of the, 84	99, 105, 279
Disease germs —another illustration of the fact that bacteria cause disease, by T. J. Burrill, 87	193
Ericaceæ , pollen tubes in, 84	94
The erysipheæ of Illinois, by T. J. Burrill, 87	301
The fallacies of popular bacterial research, by Geo. W. Lewis, 87	254
Fecundation of ovules in angiosperms, 84	93
—, list of slides illustrating the same, 84	97
Ferns and their development, 83	135, 261
Forms of bacteria on the normal eye, by Lucien Howe, 89	120
Fungus , acari destroyed, 81	49, 7
Leaf and stem , sections of, 84	216
Leaves ,* microscopic study of ashes of, 78	11
Lepidium , pollen tubes in, 84	96
Linen fibers may be mistaken for hair, 84	63
Maize kernel , * structure of, 82	18
Memorandum of slides illustrating fecundation of ovules in angio- sperms, 84	97
Papaver, pollen tubes in, 84	94, 96
Pear tree blight ,* 80	13
Plants , circulation in, 82	174, 21
Pleurosigma angulatum , supposed hemispheres, 82	80
Pollens , staining and mounting, 84	212
Pollen tubes , referred to by Kruttschnitt, 84	93
—, again, by John Kruttschnitt, 85	62
Preparation* of vegetable tissues , 79	31
Protoplasm , reticular structure of, 81 , 39, 82	97, 99 132, 135

	PAGE
Pyrola , pollen tubes in, 84	95
Pyxicola , species identified, 84	121
—, striata , n. s., 84	121
Pyxidium , species identified, 84	115
Remarks on Stephanodiscus Niagaræ , by C. M. Vorce, 85	139
Rhizosolenia gracilis , 82	17, 177
Sewage , fungi found in, 84	90
Torula cerevisiæ , 83	267
Tea and its adulterations, T. Taylor, 89	46
Urceolaria mitra , note on, 84	128
The Uredineæ of Illinois—a list of the species, by T. J. Burrill, 85 ..	93
The Ustilagineæ , or smuts, with a list of Illinois species, by T. J. Burrill, 87	45
Vegetable organisms in sewage effluents, 84	90
— sections , 84	216, 217
Vegetable tissues ,* preparation and mounting of, 79	31
Vegetable nature of croup , 82	101

ZOOLOGY.

Acari , destruction of, by fungus, 81	49
Achtheres corpulentus , 82	75
— ambloplitis , 82	76
An account of a morbid growth in a pig's stomach, 83	125, 267
Additional notes on a certain species of Rotifera , hy D. S. Kellicott, 87	181
Anatomy * of spinal chord of marsipobranchii , 79	22
Annual address of the president—the nature of Protozoa and lessons of these simplest animals, by David S. Kellicott, 88	5
Anuroea Gleasonii (rotifer), 83	119
Auricle , tumor of the left, 81	29
The bacillus of leprosy —a microscopical study of its morphological characteristics, by Chevalier Q. Jackson, 88	119
Bass sucker , 79 , 56 , 82	76
Bee ,* sting of the honey, 78	12
Beggiatoa , 84	90, 91
Bioplasm , action of electricity and other agents on, 81	23
Bioplasson doctrine, 81	39
Blood , Heitzmann's method of examination, 81	40, 43
—, micro-organisms in, 82	13, 157
—, study of, 81	10, 39

	PAGE
Blood , extra vascular, circulation of, 84	81
—, human distinguished from mammalian, 83	265
—, rheumatic, 84	194
—, corpuscles, measurement of 87	216
Brain , pathology of, 83	141
Brain sections , preparation and mounting, 82	275, 280
Branchial cleft , on the growth of the first, 79	57
Buffalo water supply , * micro-organisms in, 82	19
Bull-head , parasite on, 80	41
Capillary circulation * in man, 80	12
Carbon dioxide , effects of, on muscular contractility, 81	23
Carchesium , species identified, 84	116
Cardiac muscle cells in man and certain other mammals, by Boardman L. Oviatt, 87	283
Carterella , species of, 82	215
Carteruis , genus of sponges, 84	141
Cattle fever , Texas, 83	90
Cephalosiphon , 89	32
Chirodota , spicula of, 82	19, 139
Circulation of blood * in man, 86	12
Circulation of the blood , extra vascular, 84	81
Clinical advantages of ozone and effects on micro-organisms of infusions, 83	69, 256
Connective tissue , 82	19, 109
Contractility of muscle , 81	10, 17
Common fowl , parasites in, 83	131
The comparative size of blood corpuscles of man and domestic animals, Freda Detmers, 87	216
Cornea , why sensitive, 83	51
Cothurnia , lata, 83	113, 267
—, species identified, 84	120
—, variabilis, n. s., 83	105
Cothurnia var. Emarginata, 83	107
Cray-fish , infusoria on, 83	105
—, two parasites of, 83	115
Cricket , gizzard of, 79	69
Cristatella ophidioidea , 82	229
Croup , vegetable nature of, 82	18, 101
Daphnia Kerusses , 84	129
Deep sea , average depth of, 80	20

	PAGE
Deep sea , life of, 80	19
—, life of, how maintained, 80	24, 26, 27, 29
— life resembles that of the tertiary geological period, 80	25
— life, organisms found in, 80	21, 22, 24
— life, oxygen, large per cent. over diatomaceous ooze, 80	21
— life, soundings, 80	17, 21
Demodex folliculorum in diseases of the human face, by George E. Fell, 86	120
Demonstration of capillary circulation ,* 80	12
Destructive power of certain insects, 79	29, 68
Description of series of plates illustrating the structure of the human tooth ,* 80	7
A description of Ergasilus Chautauquænsis —a new species of Copepoda and a list of other Entomostraca found at Lake Chautauqua, in August, 1886, by Charles S. Fellows, 87	246
Determination of the number of Trichinæ or other animal parasites in a given quantity of meat, by Simon H. Gage, 87	191
Effects of division of the vagi on the heart, 83	47, 261
Egg-like bodies in liver of the rabbit, 83	167
Ending and relation of the muscular fibers in the muscles of minute animals (mouse, mole, bat, and English sparrow), abstract, by Susanna Phelps Gage, 87	207
Entomostraca , collecting, dissecting, and mounting, 86	186
—, found in Lake Chautauqua, 87	246
Epistylis fugitans , n. s., 84	118
—, Niagaræ, n. s., 83 , 110, 84	117
—, species identified, with notes, 84	117
Epithelium ,* 78	15
Erie , organisms found in Lake, 81 , 51, 82	187
Eustachian tube , and middle ear, 79	24, 57, 58
Extra vascular circulation of the blood, 84	81, 267
Fat cells , observations on, 82	19, 109
Fibroin , analysis of, 84	133
First development of muscle in the embryo of the chick and man, by M. L. Holbrook, 85	71
Fishes , crustaceous parasites of, 79 , 22, 53, 64, 80 , 41, 81 , 12, 82	9, 75
Flagellate infusorium , a new, 80	10, 44
Floscularia , notes on American species, 84	129
—, discussion on, 85	228
—, <i>Millsii</i> , 85 , 48, 87	181

The form and size of the red blood corpuscles of the adult and larval lamprey eels of Cayuga Lake, by Simon Henry Gage, 88	77
Glandular secretion , Brown-Sequard, 89	164
Glandular organs under control of nervous system, 83	52
Gomphogaster , notes on, 87 , 250, 90	174
Grasshopper , gizzard of, 79	68
Gregarina in the American lobster, 81	47
Growth of branchial cleft , 79	57
Hair , characteristic distinctions between human and animal, 84	65, 68
—, microscopically examined and medico-legally considered, 84	59, 265
—, substances which may be mistaken for, 84	62
Heart , effects of division of vagi on, 82	13, 91, 261
—, effects of division of the vagi on muscles of, 83	47
Herring (lake) sucker , the gill, 79 , 54, 82	75
Heteromeyenia , characters of, 82	213
Heteromeyenia longistylis , n. s., 84	146
—, Ryderi, 84	146
Holothuroidea , spicules in certain species, 82	139
Honey-bee ,* sting of, 78	12
Infusorium , a new flagellate, 80	44
Infusoria , observations on, with description of new species, 84	110
—, found in cray fish, 83	105
—, new, 83 , 105, 110, 113, 84	114, 118-9, 121-2
—, notes on, 84	126
—, fresh water, n. s., 85	38
Insects , destructive powers of, 79	68
Internal parasites of common fowl, 83	131, 267
Jute may be mistaken for hair, 84	62
Kidney , termination of nerves in, 83	51
Lagenophreys , species identified, 84	121
Laguncula piscatoris , 80	44
Lake Erie , forms observed in waters of, 81 , 51, 82	10, 178
Lake herring , parasites upon, 79 , 54, 56, 82	75
Laminosioptes gallinorum , 83	132
Left auricle , tumor of, 81	29
Leptodora hyalina , mounted specimens given to the Society, 84	272
Leueocera cruciata , observations on, 79	64
—, pectoralis, 82	77
—, tortua, 80	41
Leucocytes ,* migration of, 78	12

	PAGE
Life in the deep sea , how maintained, 80	17, 36
—, resembles that of tertiary age, 80	25
Liver , termination of the nerves in the, 82	13, 95, 264
Lobster , stucture of the muscles of, 82	17, 131
—, parasites in the, 81	47
Locust , gizzard of, 79	68
Lungs , how prepared for examination, 81	36
—, innervation of, 81	35
— of frog, 81	35
— of salamander, 81	36
— of turtle, 81	36
Marsipobranchii , * anatomy of spinal cord of, 79	22
The Meibomian glands of the cat, note, by E. H. Sargent, 86	143
Menobranchus , observations on fat cells of, 82	19, 110
Meyenia , character and species, 82	212
Meyenia Everetti , n. s., 84	146
—, Leidy, mentioned as growing in water mains, 84	136
—, Millsii, 84	147
—, subdivisa, n. s., 84	147
Microscopical examination of and experiments with glandular secretions according to method of Dr. Brown-Sequard, by George E. Fell, 89	115
Microscopic fossils * in boulder clay, 84	274
Microscopical examination of hair , 84	59
Micro-organisms , in blood of a case of tetanus, 82	13, 157
—, Buffalo water supply, 82	19, 209
—, Cleveland water supply, 81	51, 187
Migration of Leucocytes *, 78	12
Morbid growth in pig's stomach, 83	125
Morphology of rheumatic blood , 84	194, 264
The muscular coats of the oesophagus of the domesticated animals, by Leonard Pearson, 88	128
Muscle , irritability of striated and non-striated, 81	19, 21
—, structure of in the lobster, 82	13, 131
Muscular contractility , 81	17
—, fibers under polarized light, 81	24
Necturus , observations on fat cells of, 82	19, 109
Nerve centers ,* microscopical examination of, 79	26
Nerves of the lungs, 81	35

	PAGE
Nerves , termination of, in the liver, 82	13, 95, 264
—, * termination of, in the testicle, 82	17
Nerves control glandular organs, 83	52
—, termination of in the kidneys, 83	51
—, vagi, effects of cutting, on muscles of heart, 83	47
A new Rotiferon , by D. S. Kellicott, 89	32
Some new and rare Infusoria , by D. S. Kellicott, 87	187
A new Floscule , by D. S. Kellicott, 85	48
Note on a new Rotifer , <i>Gomphogaster Areolatus</i> , by C. M. Vorce, 87	250
Notes on the structure of the moth Attacus Cecropia (<i>abstract</i>), by H. N. Lyon, 89	135
Notes on the fresh-water sponges , by Henry Mills, 86	132
Notes on the epithelium lining the mouth of Necturus and <i>Menopoma</i> , by S. H. Gage, 85	126
A note on Argulus Catostomi , by D. S. Kellicott, 86	144
Observations on Infusoria , with descriptions of new species, 84	110, 267
—, on some vessels in the spinal cord of the cat, 83	257
—, spermatozoon , shape and movements of human, 83	121, 267
Observations on fresh-water Infusoria , by David S. Kellicott, 88	97
Observations on some fresh-water Infusoria , with descriptions of a few species regarded as new, by D. S. Kellicott, 85	38
On the development and a supposed new method of reproduction in the sun-animalcule Actinospharium Eichhornii , by John M. Stedman, 88	107
On some egg-like bodies in the liver of the rabbit, 83	167, 267
On some Infusoria found on the cray-fish, 83	105, 259
Opercularia elongata , n. s., 84	119
—, rugosa , n. s., 84	119
Opercularia , species identified, 84	119
Ophrydina , species identified, 84	122
Organisms found in deep sea ooze, 79	22, 24
— found in potable water, 79 , 29 , 82	10, 19, 187, 209
Paludicella , characters of, 82	225
Paramecium Aurelia , note on, 84	127
Parasites in common fowl, 83	131
— in liver of rabbit, 83	167
— on cray-fish, 83	105, 115
— on fish, 79 , 22 , 53 , 64 , 80 41 , 82	9, 75
— in American lobster, 81	7, 47
Pathology of the human brain, 83	141

	PAGE
Pectinatella magnifica , 82	228
Periodicity of life in water of Lake Erie, 81	53, 55
Platycola , species identified, 84	121
Pleiomeyenia , n. gen., 84	147
—, <i>Calumeticus</i> , n. s., 84	147
—, <i>Spinifera</i> , n. s., 84	147
—, <i>Walkerii</i> , n. s., 84	147
Plumatella obisperma , and other species, 82	226-8
Pneumogastriacs , effects of cutting on respiration, 81	35
Polyzoa , observations on species detected in the vicinity of Buffalo, 82	13, 217
—, statoblasts of, 82	254
Preparation and mounting of Formanifera , with description of new slide for opaque objects, 83	65, 267
Rabbit , parasites in liver of, 83	167
Redding, Jacob, on muscular contractility , 81	10, 17
Some remarks on fat infiltration of the liver, by Louis M. Eastman, 85	60
Remarks on pathogenic bacteria , 83	87, 256
Researches on the anatomy of Amphistomum Fabaceum Diesing, by John Moore Stedman, 89	85
Reticular structure blood corpuscle, 82	265
Rhabdostyla , species identified, 84	115
Rheumatic blood , morphology of, 84	194
Rock bass , parasites on, 79 , 56, 64, 82	76
Rotatoria , notes on, 84	129
Rotifer , a new species of, 83	119
Rotifera of Shiawassee river, Corunna, Michigan, D. S. Kellicott, 88	84
—, <i>Cephalosiphon</i> , 89	32
Scyphidia ovata , n. s., 84	114
—, identified, 84	112
Seminal stains , microscopical examination of, 83	21, 220
Silk may be mistaken for hair, 84	63
The soft palate in the domestic cat, by T. B. Stowell, 88	58
Spermatozoon , human, 83	121
Spicula of the Chirodota , 82	19, 139
Spinal cord of Marsipobranchii ,* 79	32
Sponges , fresh-water, 82	12, 209, 253
—, thoughts on (and description of new species), 84	131
—, finding, collecting, and preserving, 88	178

	PAGE
Stentors , note on, 84	126
Stephanoceras Eichhornii , note on, 84	129
Stichotricha secunda , note on, 84	127
Sting of the honey bee,* 78	12
Stomach of pig , morbid growth in, 83	125
Studies of the development of cartilage in the embryo of the chick and man, by M. L. Holbrook, 85	76
Stylohedra , n. gen., 84	122
—, lenticula, n. s., 84	122
The tape-worm —methods of preparation for the museum and the microscope, by J. M. Stedman, 87	243
Tentaculifera , species identified, 84	123
Termination of the nerves in the kidney, 83	51, 265
Testicle , * termination of nerves in, 82	17
Tetanus , micro-organisms in blood of a case, 82	13, 157
—, supposed cause of, 83	88
Texas cattle fever , 83	90, 94
Thoughts on the Spongida æ, 84	131, 274, 275
Thuricola , species identified, 84	120
Tooth ,* description of structure of human, 80	7
Trachelocera olor , note on, 84	128
Trichina æ, discussion on, 85	236
—, to count, 87	191
Trematode , parasite of cray-fish, 83	115
Trichocephalus affinis , eggs of, in liver of rabbit, 83	168
Tubella , characters of, 82	213
Tumor of left auricle , 81	9, 29
—, mode of origin, 81	32
Vaginicolia , species identified, with notes, 84	120
Vagi , effects of division on the heart, 82	13, 91, 261
Vorticellia , species identified, with notes, 84	112, 120
White blood corpuscles , granules in, 81	45
Wild animals , epidemics among, 85	241
Worms , described, 83	117
Zoothamnium , species identified, 84	117

MISCELLANEOUS, HANDWRITING, ETC.

Adulterations of lard , detection of, 83	97
Agricultural Department , * U. S., microscopical work of, 79	28
Average depth of the sea , 80	20

Butter and fats: To distinguish one fat from another by means of the microscope, by Thomas Taylor, 85	128
Butter and its adulterations, Weber, 86	103
Challenger, H. M. S. , cruise of, 80	19, 25
Circumstances affecting writing , 80	55
College Microscopical Societies , 83	27, 225, 255
Comparing room , Harvard College, 82	248
Crystallization by cold, 87	342
The crystallography of butter and other fats, by Thomas Taylor, 87 ..	315
Croup , vegetable nature of, 82	101
Crystals , microscopic, 84	216
Dallinger, W. H. , elected honorary member of the Society, 84	265
—, introduced to the Society, 84	262, 269
—, referred to, 83 , 33, 40, 84	6
Deposition of silver on glass, etc., 84	71, 267
Diffraction theory of light, 82	255, 261
Dredging excursion, Chautauqua Lake, 86	174
Division of labor among microscopists, 83	43, 231
Electricity , action of, on bioplasm, 81	23
—, on protoplasm, 90	1
Evolution , remarks on, by H. L. Smith, 80	17, 18, 29
Examination of agreement , Exhibit "B," People against Colby, 84 47, 273	
Examination of legal documents with the microscope, qualifications of examiner, by George E. Fell, 89	102
Examination of potable waters , 89	145
Exhibitors must close their rooms during meetings of Society, 80 ..	6
Fees of experts , 90	237
Forgery , detection of, discussion on, 90	211
Forty years acquaintance with the microscope and microscopists, by Charles E. West, 86	161
Griffith prize , 79 , 23, 80 , 9, 13, 81	13
Stowell prize , 82	7
Ink , influence of, on handwriting, 80	52
Intensity and quantity of light , effects of, on microscopic and tele- scopic observation, 82	79, 90
Invitation , Indiana Lyceum of natural history invites microscopists to meet at Indianapolis, 78	4
Lard , adulteration detected by microscope, 83	97
Medic-legal microscopy , discussion on, 90	213, 217

	PAGE
Members, honorary, 81, 8, 83, 275, 84	265
Membership, prepayment of dues, 83	254
Metals, radiation of heat between, with numerical results for brass and for steel, by W. A. Rogers, 88	33
Metric system, 79	41, 43
Microscope in detection of lard adulteration, 83	97
Microscopical examination of butter and its adulterations, by H. A. Weber, 86	103
Ozone, effect on micro-organisms, 83	69, 232
Note on microscopical exhibitions , by R. H. Ward, 87	311
National Microscopical Congress, 78	4
Oxygen, large per cent., in deep-sea ooze, 80	21

AMERICAN SOCIETY OF MICROSCOPISTS.

CIRCULAR.

The subscriber desires to inform the members of the American Society of Microscopists and others that he can supply any or all of the Volumes of the Proceedings of the Society at the following prices :

1878-9, Indianapolis and Buffalo meet'g, Vol. I,	\$.80
1880, Detroit - - - - - " II,	.80
1881, Columbus - - - - - " III,	1.10
1882, Elmira - - - - - " IV,	1.50
1883, Chicago - - - - - " V,	2.00
1884, Rochester - - - - - " VI,	2.00
1885, Cleveland - - - - - " VII,	2.00
1886, Chautauqua - - - - - " VIII,	2.00
1887, Pittsburgh - - - - - " IX,	2.00
1888, Columbus - - - - - " X,	2.00
1889, Buffalo - - - - - " XI,	2.00
1890, Detroit - - - - - " XII,	2.00

1878-9 are paged continuously. The volumes for 1882-4-6-8-10 contain general indexes.

Copies mailed on receipt of the price.

C. C. MELLOR,

Treasurer A. S. M.

77 Fifth Avenue, Pittsburg, Pa.

AND ALL THINGS PERTAINING TO THE MICROSCOPE,

GO TO

G. S. WOOLMAN,
116 Fulton Street, ~ NEW YORK.

LAMP-CHIMNEY DEALERS are apt to think that the less they pay for their chimneys, and the more they break, the better; and whether they fit the lamps they are used on or not is your affair, not theirs; and whether the shape is such as to make a poor draft—that's what a chimney is for—and perfect combustion of oil and a proper light—do you think they bother themselves with such questions?

Somebody has to think of these things. It is hardly worth your while to become an expert in lamp chimneys.

Macbeth's "pearl top" and "pearl glass" are carefully made of clear tough glass; they fit, and get the utmost light from the lamp, and they last until some accident breaks them.

"Pearl top" and "Pearl glass" are trade-marks. Look out for them and you needn't be an expert.

Pittsburgh.

GEO. A. MACBETH & CO.

American Monthly Microscopical Journal.

TWELFTH YEAR, 1891.

Contains a record of the Progress of Microscopical Work, its Instruments, Methods, Literature, and Results. It is thus a *Contribution to Biology*, that Science depending upon the Microscope for many of its most important discoveries. In the departments of *Medical Microscopy* and *Bacteriology* are epitomized the important progress that is now being made in combating disease and disease germs. Under *Technique* are contributions of several of the foremost microscopists of the country.

Bound volumes for 1885 (\$1.75 each), 1886, 1887, 1888 (\$1.35 each), made from perfectly clean and unused numbers; the four for \$5.00 if taken at once.

Prices of unbound volumes:—Vol. II (1881), \$1.50; Vol. V (1884), \$1.50; Vol. VI (1885), \$1.50; Vol. VII (1886), \$1.25; Vol. VIII (1887), \$1.25; Vol. IX (1888), \$1.00.

The volumes for 1880 (Vol. I), 1882 (Vol. III), and 1883 (Vol. IV) are out of print. Subscribers having copies to dispose of will please inform us, as we have several orders for them.

Subscription price \$1.00 per year strictly in advance. All subscriptions should end with the December number—that is, with a volume. A date on the wrapper indicates the month to which payment has been made. A blue pencil mark in the margin of this page directs attention to the date upon the wrapper.

Remittances should be made by Postal Notes, Money Orders, or by Money sent in Registered Letters. Drafts should be made payable in Washington, New York, Boston, or Philadelphia.

A few copies of Leidy's Fresh-Water Rhizopods of North America can still be had at \$5.00 per copy. P. O. Box 630, Washington, D. C.

DIRECTORY OF MICROSCOPISTS.

Information is being collected for this work, designed to bring together the addresses, etc., of all the people in this country, (1) who use the instrument, (2) write upon the subject, (3) read its literature, collect slides, etc.

Wanted.—A correspondent in every town and city who will furnish the needed information.

Wanted.—Back numbers of all microscopical periodicals, second-hand books relating to microscopy, etc.

CHARLES W. SMILEY, Publisher,
Box 630, Washington, D. C.

MICROSCOPY
IS A PROMINENT FEATURE OF
THE OBSERVER,
A Monthly Journal for all Students and Lovers of Nature.
Devoted to All Departments of Nature Studies.

E. F. BIGELOW, Editor and Publisher.

ASSOCIATE EDITORS:

“THE MICROSCOPE.”

An Illustrated Monthly Magazine, devoted to Micro-
scopical Science, for the use and instruc-
tion of the Student of Nature's
Little Things.

Edited by Dr. ALFRED C. STOKES,

AUTHOR OF “MICROSCOPY FOR BEGINNERS,” ETC.

SUBSCRIPTION, \$1.00.

SAMPLE COPY, 10 CENTS.

During 1891 the articles by “An Amateur” on the microscope stand and its accessories, that have attracted so much attention will be continued. Mr. W. H. Walmsley, the well-known expert, will contribute a series on Photo-micrography; Prof. J. A. Miller, Ph. D., Professor of Analytical Chemistry, Niagara University, will describe the microscopic and micro-spectroscopic aspects of the Kemmler blood; the Rev. A. M. Kirsch, C. S. C., Professor of Biology, University of Notre Dame, will contribute papers on Cytology, or the Histology of the Cell; with many other papers from prominent microscopists of this country and of Europe.

THE MICROSCOPE PUBLISHING CO.,

TRENTON, NEW JERSEY.

The next Annual Meeting of the American Society of Microscopists will be held in Washington, D. C., August 11, 1891, the week preceding the meeting of the American Association for the Advancement of Science. Announcements will be made by special circular.

OFFICERS OF THE SOCIETY FOR 1891.

PRESIDENT.

Dr. FRANK L. JAMES, - - - St. Louis, Mo.
